Good Health and Well Being

"To enjoy glow of good health, you must exercise." -Gene Tunney

To ensure healthy lives and promote well-being for all, Students of Grades I & II of DPS, GBN observed Sustainable Development Goal 3- 'Good Health and Well Being' in the most remarkable way. Students started their day with exercise and drill session. Teachers as well as students enjoyed the vibes of a beautiful morning by doing drills and exercise on the beats of drum. In addition, they all had healthy food to promote good health and healthy eating habits. Students were also briefed and shown videos related to the developmental goal and its importance in our lives. Children were encouraged to exercise daily and eat healthy food. These young ones are the future of our country and if they are aware of this goal and implement it, very soon we will have a fit and healthy society. This activity turned out to be a huge success as all the students were thrilled by exercising along with their friends.

Work Education- Magic of Science

“Every Student Can Learn Just Not On The Same Day Or In The Same Way.”

-George Evans

Work Education activities, at DPS, GBN, have been crafted to produce the next generation of strong and confident individuals. There is nothing more fascinating than the Magic of Science. Science helps children develop their senses and overall awareness. Integrating experiments with the regular curriculum always adds up to the learning experience of our young scholars. The Students enjoyed many activities during the month of July like Sink and Float, Solubility Test, Shadow fun and Germination Activity. The little Einsteins were gleaming with joy as they conducted the Solubility Test of different objects. They were also amazed to learn about shadows and how to make shadows of different animal figures with their fingers. Hands-on experiments nurture the intellectual curiosity of the students and encourage them to observe, explore and think. The students enjoyed all the activities and exciting experiments, and had fun with their peers.

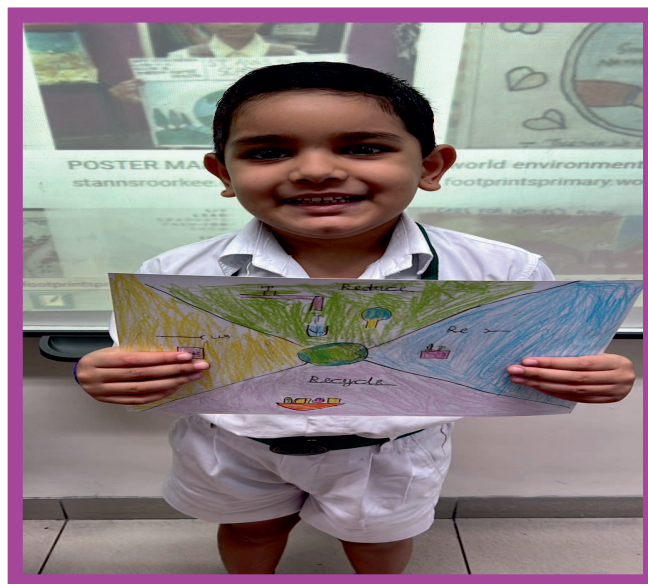

4R's (Reduce, Reuse, Recycle and Rethink)

"Nature is our treasure, help save it."

-Anonymous

To know the importance of the 4R's-Reduce, Reuse, Recycle & Rethink, Students of Grades I and II enjoyed doing amazing activities. Students of Grade I had a Ted talk on the 4 R's and they participated in it with great enthusiasm by sharing their thoughts on the topic. They confidently spoke on the topic and briefed the audience as to how they will be incorporating the 4R's to have a cleaner planet. Ted talk by such young learners was heart-melting. Students of Grade II showed their creative side and made outstanding Posters on the topic. Poster making activity was a great success as all the students did their best and enjoyed a lot. To have a clean and green environment, students must be aware of the ways of doing it. The children displayed their understanding and knowledge about nature conservation by making vibrant, colourful and meaningful Posters. They had fun along with learning and took pride in exhibiting their art work to the teachers as well as their friends.

Van Mahotsav

"Let's nurture the nature so that we can have a better future."

-Anonymous

Trees are an important part of a community and helps create a peaceful and a pleasing environment. Van Mahotsav is an annual tree-planting festival wherein thousands of trees are planted, all over the country. The Interact Club of DPS, GBN celebrated Van Mahotsav on 6th July, 2022 by organizing a Tree Plantation Drive for Grade I and II children. The celebration encouraged and sensitized the children towards planting more trees. The Students also enjoyed making Posters on this occasion. They came up with amazing ideas and inspiring quotes and exhibited the same by making posters through their artistic impression about planting more trees and saving our Mother Earth. Teachers conducted the activities based on similar theme, encouraged students to find their own vision of a greener tomorrow. The enthusiastic participation of every child was prominent and inspiring for all.

Science Week

"The important thing in Science is not so much to obtain new facts as to discover new ways of thinking about them." - William Henry Bragg

To inculcate scientific attitude and research-mindedness in young minds, Science Week was celebrated at DPS, GBN, by the scholars of Grades I and II from 25th- 29th July, 2022 with a lot of enthusiasm. A plethora of activities was organized throughout the week. The children visited the Science laboratory and were amazed to see various objects and models available in the Science lab. They cheerfully expressed their thoughts and experience on paper through sketching. Furthermore, making a Sundial from a paper plate made them super-excited and curious too. They acquired an understanding of scientific concepts, principles, and laws. The celebration awakened in them love and interest for Science and scientific knowledge.
