Young Scientists- Know and Grow

Everything is theoretically impossible, until it is done.

- Robert A. Heinlein

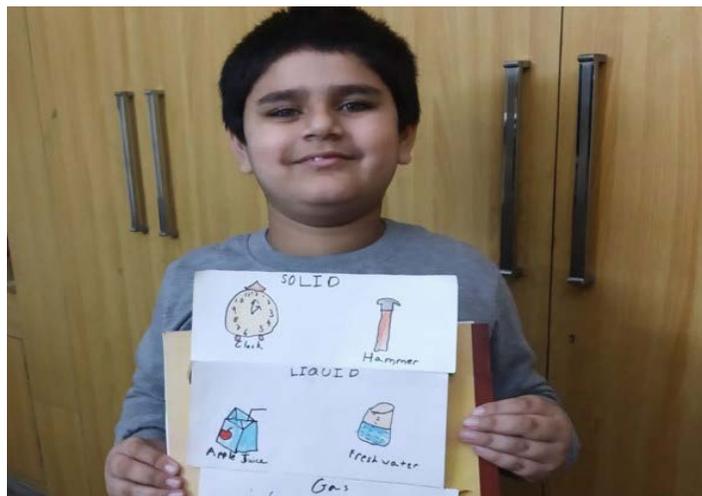

Science plays a major role in almost everything we do, thus, it is easy to incorporate simple science concepts into fun experiments. Keeping this in mind, DPS, GBN organised 'Young Scientist', under the flagship of Work Education (WE) Activities in the month of December. Children learnt and enjoyed many different experiments like that of Sink and Float, the 3 states of matter etc. These experiments helped them to enhance their knowledge. The idea behind the activity was to allow children to explore their world and discover new things, doing hands on experiments using materials easily available at home. Every weeks' activities were done with great gusto. The videos and presentations shown cleared their concepts completely. It was indeed a fun filled month, with our young scientists eagerly awaiting the next activity every week. These hands-on experiments nurture the intellectual curiosity of the students and encourage them to observe and think. Children participated in the WE Young Scientist classes with full enthusiasm and zeal.

The Winning League

"It's not the will to win that matters – everyone has that. It's the will to prepare to win that matters."

-Bear Bryant

It is rightly said, 'Bigger the challenge, bigger the opportunity.' In life, we do not succeed by dreaming, but achieve success with determination and by working hard. Students of Pre-primary Wing participated in an Online Inter School Competition, 'HASTAKALA 2020' held at GD GOENKA School, Greater Noida on November 10, 2020. It fills our heart with pride to see our students excel in every sphere of life. Varshika Lodhi of ID bagged the First Position in the event of Dot Painting while Ishita Saxena of IC bagged the Third Position in the event of Puppet Making. Avishi Bartar of III C bagged First Position in the event Mandala Art. Our participants Vivaan Dogra of II C for Puppet Making and Advika Khare of II F for Aboriginal Art-Dot Painting gave a riveting performance as well. Kudos to our young ones for taking our school to such great heights. All the children participated in the competition with full vigour and enthusiasm. Small opportunities are often beginning of great achievements and we, Dipsites, always aim for success and believe in making our future bright.

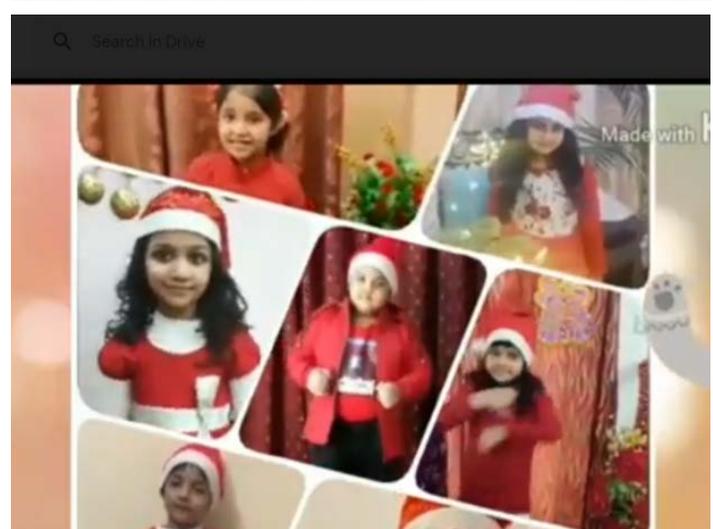

Special Assembly on Christmas- Joy of Giving

“Christmas isn’t a season, it’s a feeling”.

- Edna Ferber

Christmas is a festival of joy and sharing. To spread this message of love and good cheer, Class I organized a special Christmas assembly on December 23, 2020. A wonderful performance by our young ones on the song ‘Gods’ Love’ and Christmas Carols resonated on our on-line assembly igniting the festive cheer and spreading a feeling of peace and harmony all around. The National Anthem was beautifully executed, keeping our audience captivated to the assembly. The beautiful morning prayer by our Principal ma’am, Ms. Bhawna Khanna, kept the morale and hope of our students high, while a heart-warming message from our Director ma’am, Ms. Indira Kohli, brightened our day and brought a smile to each one of us. The spirit of the festival was beautifully portrayed through a lovely narrative of the Christmas Teachings. The children looked lovely in their bright costumes. This extraordinary performance of the children created an aura of festivity and joy. It was a captivating performance indeed.

The Spirit of Christmas

“Help others without any reason and give without the expectation of receiving anything in return.”

-Roy T. Bennett

Christmas trees, stockings, Santa caps, jingling bells and more! Yes, Christmas is round the corner! With festivities in the air, cheer in our hearts, DPS, GBN organized a fun filled online Christmas party for its students on December 22, 2020. ‘Dashing through the snow’, Rudolph the Red Nosed Reindeer, ‘Jingle Bells’ were a few popular tunes that echoed through the devices of our students into their homes, spreading joy and happiness to each one around them. It was indeed a time to cheer, to fill our hearts with hope and enjoy the spirit of Christmas. While our little ones danced to the music, sang the Christmas carols, played their favourite games, it was heartening to see them stay committed to the spirit of Christmas of sharing. It was a lovely gesture by our young ones to spread cheer by gifting and donating items to their house help and to the less fortunate. This virtue of sharing will take them a long way in life and will make the world a better place. Our little Dipsites enjoyed the party in the true spirit of Christmas spreading happiness, joy, laughter and hope making it a meaningful event

National Mathematics Day

"Mathematics is not about numbers, equations, computations or algorithms: it is about understanding."

-William Thurston

Mathematics nurtures our power of reasoning, creativity, critical thinking, problem-solving ability, and even effective communication skills. India celebrates Mathematics Day every year on December 22 to mark the birth anniversary of our very famous mathematical genius Srinivasa Ramanujan. We at DPS, GBN, believe in integrating academia with fulfilled activities which helps the students to stay interested and enjoy learning concepts. Keeping this in mind, Classes I, II and III celebrated National Mathematics Day, online, on Tuesday, December 22, 2020 to spread awareness amongst our students on the achievements of our great Mathematician. Our young ones were briefed on the life and achievements of Srinivasa Ramanujan, which inspired these young minds greatly. While the students of Class I enjoyed solving simple addition by calculating the value of shapes, Class II learned to crack the number codes effortlessly. Young scholars of Class III aced the problems of the mathematical wheel provided to them in the stipulated time limit. The teachers also discussed a lot of mathematical tricks with the children which transported them to a whole new world of this subject. The students participated in this celebration with full enthusiasm and zeal and also appreciated the different and interesting perspective provided to them on this subject.
