First Week of School

The corridors echoed with laughter and classrooms buzzed with activities as DPS GBN welcomed students back for a new academic year on April 12, 2024. The week started with engaging activities designed to spark joy, reconnect with friends, and ignite a love for learning. Our young learners embarked on a journey of discovery and delight. Their imaginations soared during a story-based puppet show, sparking curiosity and laughter. They explored the vibrant world of Warli art, creating beautiful geometric patterns to unleash their inner artist. Children also got messy (in the best way!) with some creative vegetable printing, transforming everyday veggies into artistic tools. Further, the week included an energetic Zumba session, getting wiggles out and building coordination. Educational games like number fun and word ladder kept their minds sharp and smiles wide. By the end of the week, our little scholars were buzzing with new experiences, newfound friendships, and a love for learning that shines bright. This first week was more than just a return to School, it was a celebration of learning, creativity, and the joy of being together. With hearts full of excitement and minds buzzing with possibilities, everyone was eager to dive into a fantastic year!

Earth Day Celebration

"He that plants trees, loves others beside himself." - Thomas Fuller

April 22nd is Earth Day, and DPS GBN went all out to celebrate our amazing planet virtually this year! The students of classes I & II organized a wonderful Earth Day event on April 22, 2024 to raise awareness about environmental issues and share ways we can all work to protect Mother Earth. The day kicked off with group discussion, where students highlighted environmental issues like pollution, deforestation, and waste. This set the stage for the rest of the day's activities which focused on the 5 Rs - Refuse, Reduce, Reuse, Repurpose and Recycle. Every student and teacher took a pledge to make earth-friendly choices and do their part to create a more sustainable future. We all promised to ditch single-use plastics, turn off lights when leaving a room, take shorter showers, walk or bike instead of driving when possible, and properly dispose of all trash and recyclables. Later, students participated in a poster making activity. Armed with paints, markers, and recycled materials, the creative environmentalists made vibrant "Save Water" posters to conserve this precious resource. The posters were overflowing with water conservation tips and illustrations of people being responsible with water usage. To cap off the celebrations, each student wrote a personal "Promise to Mother Earth" note pledging how they will help the environment moving forward. Through initiatives like our Earth Day celebration, we're sowing the seeds of environmental awareness and empowering our students to become champions of change in their communities. Together, let's continue to tread lightly on the Earth and inspire others to join us on this journey towards a more sustainable future. Happy Earth Day!

Special Week

DPS GBN hosted a special week - Green Footprints virtually for the students of class I and II. It was a week filled with vibrant colours, eco-friendly actions, and a powerful message for our eco-saviours! The event proved that going green can be both educational and engaging, no matter your location. The week kicked off with a fun-filled poster-making session where students unleashed their artistic talents and draw posters related to protecting our environment. The week wasn't just about raising awareness; it was about fostering a personal connection with the environment. Students brought a touch of "green" home with a unique craft project. They transformed discarded items into functional pen stands, showcasing their creativity. Additionally they made stylish cloth bag with vibrant designs using recycled materials. Further students participated in a hands-on activity, learning the importance of waste segregation by using designated bins for wet and dry waste. It was a practical experience to empower them to make a difference in their everyday lives. Going online for the Green Footprint Activity proved to be a great success! It allowed for wider participation, reduced our own carbon footprint for the event, and fostered a sense of global community around environmental responsibility.

Students of classes I and II celebrated their love of reading during a special week named Readathon. The fun-filled week was packed with engaging activities that encouraged the young learners to explore the wonderful world of books.

The highlight was the reading marathon, where students of class I gathered in the library and took turns reading aloud their favorite stories and poems. Listening to their classmates' expressive reading helped spark the students' imagination and appreciation for literature. Class II were given age-appropriate storybooks and asked to read them. They then wrote the book titles in their notebooks. The week also included an introduction to the renowned poet Shri Rabindranath Tagore. The children learned about Tagore's life and works through an interactive presentation.

No Readathon week is complete without a bookmark-making station! The young artists of class I designed unique bookmarks. They couldn't wait to use their custom creations to mark the spot in their latest book. At the same time, children in Class II designed book reviews based on the books they read the previous day. In their reviews, they mentioned the title of the book, their favorite character, and how they found the book (interesting, funny, etc.) From reading challenges to author meet-and-greets, the students returned to their regular schedules.

Achiever's Gallery

With their outstanding accomplishments, Shubh Sahu and Nasir Hasan Mehndi have not only brought glory to themselves but also to our DPS GBN. Their dedication, hard work, and unwavering commitment to excellence serve as inspirations to all aspiring minds. In the Ignited Mind Lab competition, Shubh Sahu's innovative thinking and problem-solving skills have set a high standard for future participants. His ability to navigate complex challenges with poise and ingenuity truly sets him apart. Similarly, in Spellbee, both Shubh Sahu and Nasir Hasan Mehndi showcased the beauty of linguistic mastery. Their success underscores the importance of perseverance and passion in achieving one's goals. As we celebrate their victories, let us also recognize the endless support and encouragement provided by their mentors, teachers, and loved ones. It is through their guidance and belief in their potential that Shubh Sahu and Nasir Hasan Mehndi have reached such remarkable heights.
